- **Data Structures and Algorithms in Java.**

PROJECTS

Plugged (iOS App Backend) - [link](#)

April 2025 – June 2025

- **Project Overview:** Developed the backend for a social media app (client:Voodoo) enabling users to curate and share music, movies, TV shows, and books with interactive social features.
- **Technologies Used:** Firebase, Apple MusicKit & API, TMDB API, Google Books API.
- **Key Achievements:** Built a serverless backend with Firebase services, integrated multiple content APIs, enabled list creation and sharing, real-time group chat, and social features like follow, unfollow, block, and notifications, etc.

BlankCanvasDesign.co (Company Website) - [link](#)

July 2025 – Aug 2025

- **Project Overview:** Developed the official website for Blank Canvas Design Co., showcasing the company's core services in photo and carousel editing.
- **Technologies Used:** Vite, ReactJS, Tailwind CSS, Anime.js, Konva.js, GitHub Pages.
- **Key Achievements:** Built an interactive drag-and-drop canvas with smooth animations, implemented custom features using Anime.js and Konva.js.

Tawk2 Relationship Cards (Android Project) - [link](#)

Feb 2025

- **Project Overview:** Developed a card-based game app featuring category-based question cards and AI-powered card generation for subscribed users.
- **Technologies Used:** React Native Expo, SQLite, OpenAI API, JavaScript, Google Play In-App Purchases, Google Play Console.
- **Key Achievements:** Created a card game with various categories, integrated AI for generating additional cards, and implemented a subscription-based model with secure in-app purchases.

EXPERIENCE

Full Stack Developer, Blank Canvas & Design Co.

Aug 2024 – Sept 2025

- Developed intuitive user interfaces like “blankcanvasdesign.co” using ReactJS and React Native (Android).
- Created full-fledged backends for various apps, including Android and iOS applications.
- Integrated OpenAI API and Assistants API for enhanced AI functionalities.
- Contributed to delivering a secure payment system to the company using google play In-app subscriptions.

Web Developer Intern (During College years)

March 2023 – April 2023

- Developed software solutions for clients using ReactJS and various frontend React libraries.
- Improved reach and customer satisfaction by implementing innovative frontend solutions.
- Contributed to projects aimed at enhancing user experience and overall product quality.

ACHIEVEMENTS

- Won 1st prize in Research paper presentation for Final year project at College level.
- Scored “93.65” percentile in JEE Mains 2020 - (2nd rank in 2024 batch).
- Got under 7000 Rank in WBJEE 2020.
- Won 1st prize in IQ competition twice at High School Level.

EXTRA CURRICULARS

- Guitarist with extensive participation in college and university events.
- Active member of the "ART CIRCLE" throughout college, contributing collaboratively.
- Skilled in music and video editing.
- Keen interest in reading self-improvement books.
